Fifsee app has been started as a one-stop-smart hub for real-estate enthusiasts globally. Fifsee is built around the idea of eliminating the commissions involved in real estate buying and selling process and be the most reliable, easy-to-use, and efficient real estate buy-sell application available to customers and businesses today. We strived to make the real estate market more accessible through digitalized means and reduce the costs of selling and purchasing properties. Therefore, our experts have sat down to develop a platform that can change the way the real estate market works for good. The best part about the Fifsee app is that it helps not only the buyers and sellers but also the businesses in this industry.

To make negotiations easier, the Fifsee includes a direct chat system between the buyers, sellers, lenders, registrars and all other 3rd party real estate businesses. All details about the property and its specifics can be negotiated online through the system. Once the buyers and sellers show interest in each other's offers, Fifsee helps them connect with the third parties required to ease the transaction by scheduling appointments for required services directly through our platform. We have Attorneys, Notaries, Mortgage lenders and ESCROW officers / registrars at our disposal to help you out through Fifsee connections.
